

## Recommended HDDs for LS441D Enclosure

All listed HDD have SATA III (Gbs) interface. Buffalo recommends using the same product model in all populated bays. Original data saved on the added drive(s) will be deleted. Previously used Hard Drives might have different partition sizes. Please delete all existing partitions prior to use. Firmware updates require at least one installed Hard Drive. Although most SATA interface Hard Drives will work with Buffalo LinkStations and TeraStations, Hard Drives listed here were tested for functionality and are therefore recommended. Please only use HDD with CE certification.

### WESTERN DIGITAL
